***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1 and 3, drawn to a method for the treatment of a disorder of the central nervous system and/or the eye, comprising the use of a compound capable of modulating a target gene or gene product.

Group II, claim(s) 2 and 3, drawn to the use of a compound capable of modulating a target gene or gene product for the preparation of a pharmaceutical composition.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The special technical feature of Groups I and II is a compound capable of modulating a target gene or gene product. However, this cannot be the special technical feature because the element is shown in the prior art. Elbashir et al. (2001) *Nature* 411:494–498 teach an siRNA duplex that suppresses the expression of *Photinus pyralis* luciferase in several different mammalian cell lines (Figs. 1 and 2, page 495), and an siRNA duplex that suppresses lamin A/C in cultured HeLa cells (Fig. 4, page 497).

Thus, unity of invention is lacking.

Claims 4–91 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, these claims have not been included in either of the groups above.

### *Conclusion*

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
